

TATA STRUCTURA GP

High Quality Steel Hollow Sections with 120 GSM Zinc coating
for structural applications

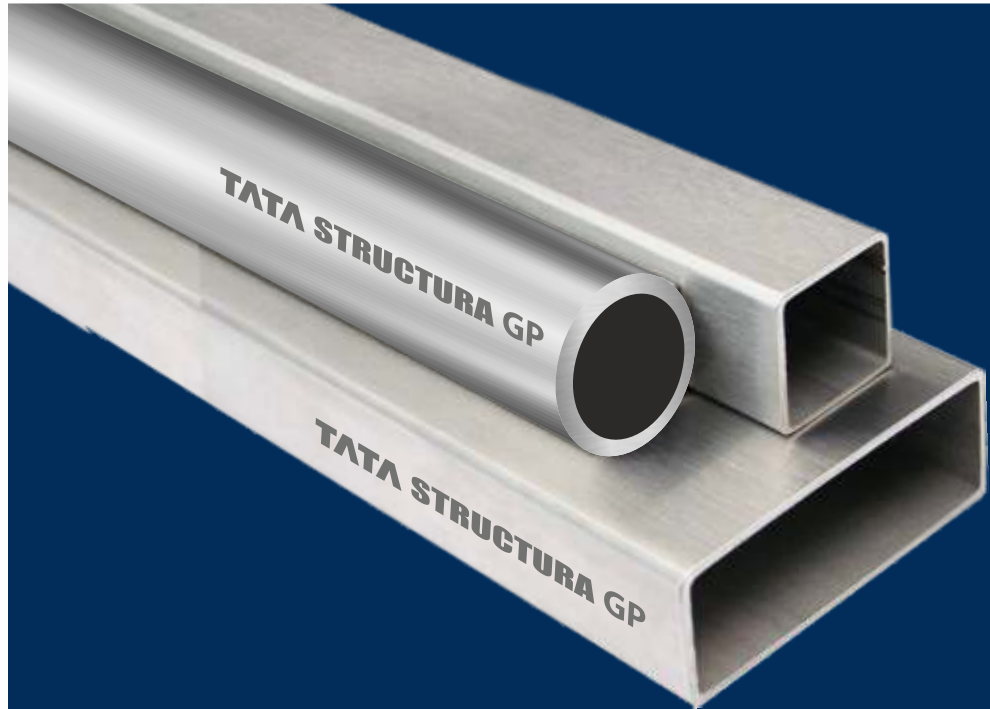

Structuring Value

Tata Structura was launched in the early 2000s. Since then the brand has played a pivotal role in transforming the construction scene in India with architectural landmarks like airports, railway stations, metro, malls and stadiums. By introducing Hollow Section Tubes, possibilities have become endless the brand has grown 10 times in retail between the years 2013 to 2020 and currently commands close to 10% market share.

Tata Steel - Tubes Strategic Business Unit (SBU) manufactures Structural Tubes under the brand name of 'TATA STRUCTURA'. Tata Structura Steel Hollow sections are superior in quality and are manufactured using raw materials that come from Tata Steel's world-class Hot Strip Mill.

Tata Structura GP Tube is the product introduced by Tata Steel Tubes Division, a leading manufacturer of welded pipes in the country and has presence in different segments namely Conveyance, Structural and Automotive applications. It manufactures welded steel pipes and tubes at its own plant in Jamshedpur and at external processing agents.

What is GP Tube ?

GP structural tube is steel tube formed through continuous welding using high strength pre galvanized steel coil with 120 GSM pure Zinc coating and then are sprayed with zinc on the welding line of the outer surface of the tube. GP tube is meant for load bearing applications.

Quality Control

The quality of each Tata Structura Steel Hollow Section undergoes strict scrutiny during the manufacturing process. It starts with slitting the strip edges, continues with speed, temperature control during the high frequency induction welding and is followed by online non-destructive eddy current testing directly after welding. Off-line drift and flattening tests are also conducted. This is all within the IS 9000 Quality Management System.

Applications

Grilles

Green House Sheds

Tractor Sheds

Crop Sheds

Gates

Roofshed

Fences

Handrails

Manufacturing process of **Tata Structura GP**

Pre galvanized HR coils from Tata Steel with 120 GSM coating formed into circular, square and rectangular hollow section tubes by roll forming process with zinc spray on the welding joints to cover weld lines on the outside surface.

**PRE-GALVANIZED
SHEET OF HR COILS
WITH 120 GSM
ZINC COATING

Advantages of Tata Structura GP

Tata Trust

Tata high quality raw material

Good for painting during fabrication

Rough surface

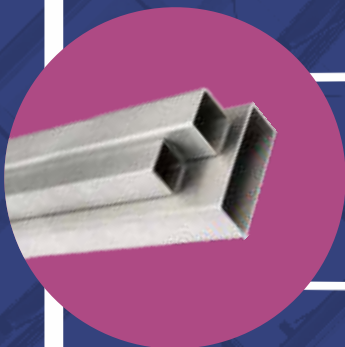

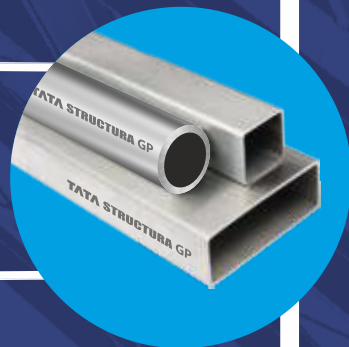

Strong welding joints

Long Lasting

Smooth end burr

Saves money for less wastage of materials

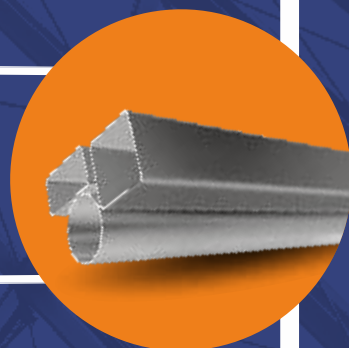

Unique straightness

Impeccably straight fabrication can be done in shorter duration

Light weight

Per Kg price is minimum

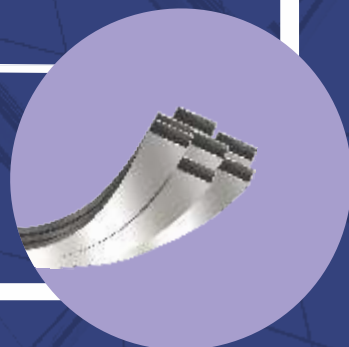

High strength of tube

Made for load bearing applications

High bendability

Flexible for any design

Tata Structura GP Section Size Range

Weight of One Tube in Kg/metre				
		Thickness		
Section	Size	1.6 mm	1.8 mm	2.0 mm
 Circular Sections	15 NB	0.78	0.87	0.95
	20 NB	1	1.11	1.23
	25 NB	1.27	1.42	1.56
	32 NB	1.61	1.8	1.99
	40 NB	1.84	2.06	2.28
	50 NB	2.32	2.6	2.88
	80 NB	3.44	3.87	4.29
 Square Sections	20*20	0.87	0.96	1.05
	38*38	1.78	1.98	2.18
	40*40	1.88	2.09	2.31
	50*50	2.38	2.66	2.93
	72*72	3.49	3.9	4.32
 Rectangular Sections	40*10	1.12	1.25	1.36
	40*20	1.38	1.53	1.68
	50*25	1.75	1.95	2.15
	60*40	2.38	2.66	2.93
	75*25	2.38	2.66	2.93
	80*40	2.88	3.22	3.56
	96*48	3.49	3.9	4.32

Product attributes of **Tata Structura GP**

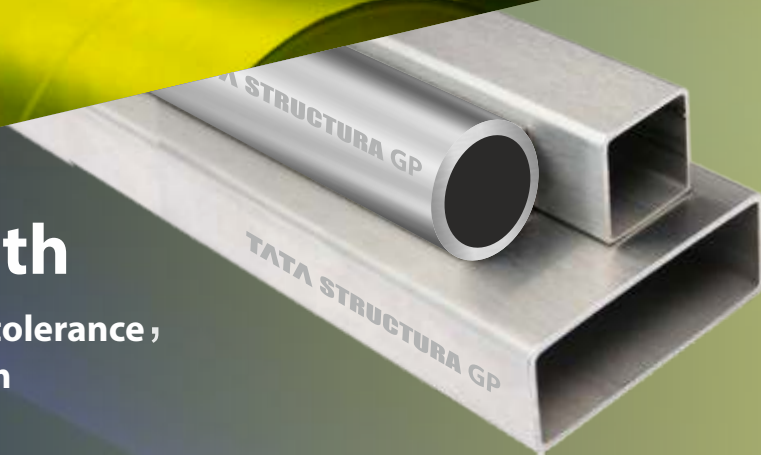

Raw Material

High strength Pre Galvanized
steel coils of TSBSL

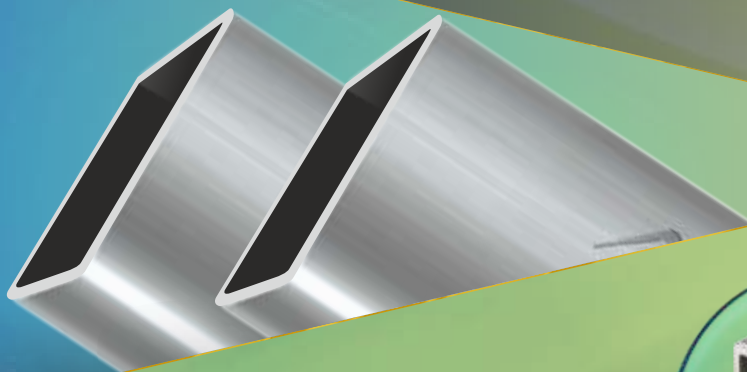

Length

6 metre, tolerance,
+/- 50 mm

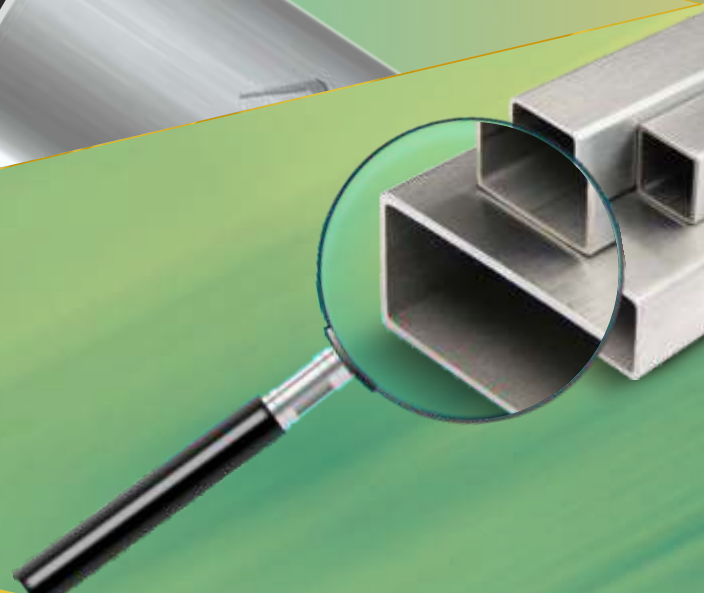

End Finish

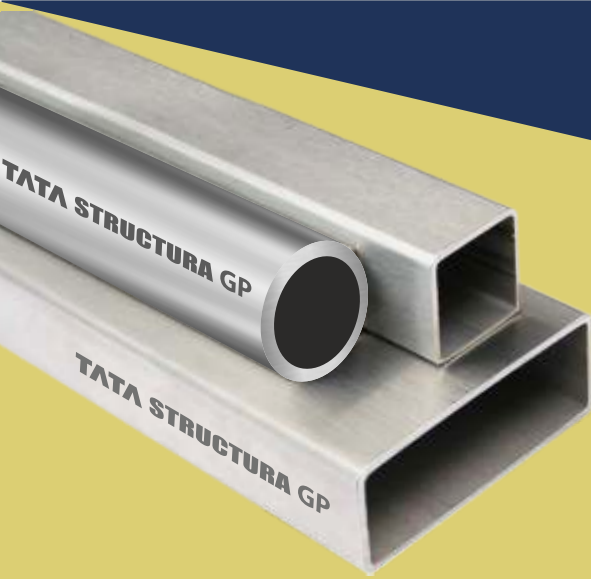

Smooth end burr

Quality

Weight tolerance +/- 10%

Identification

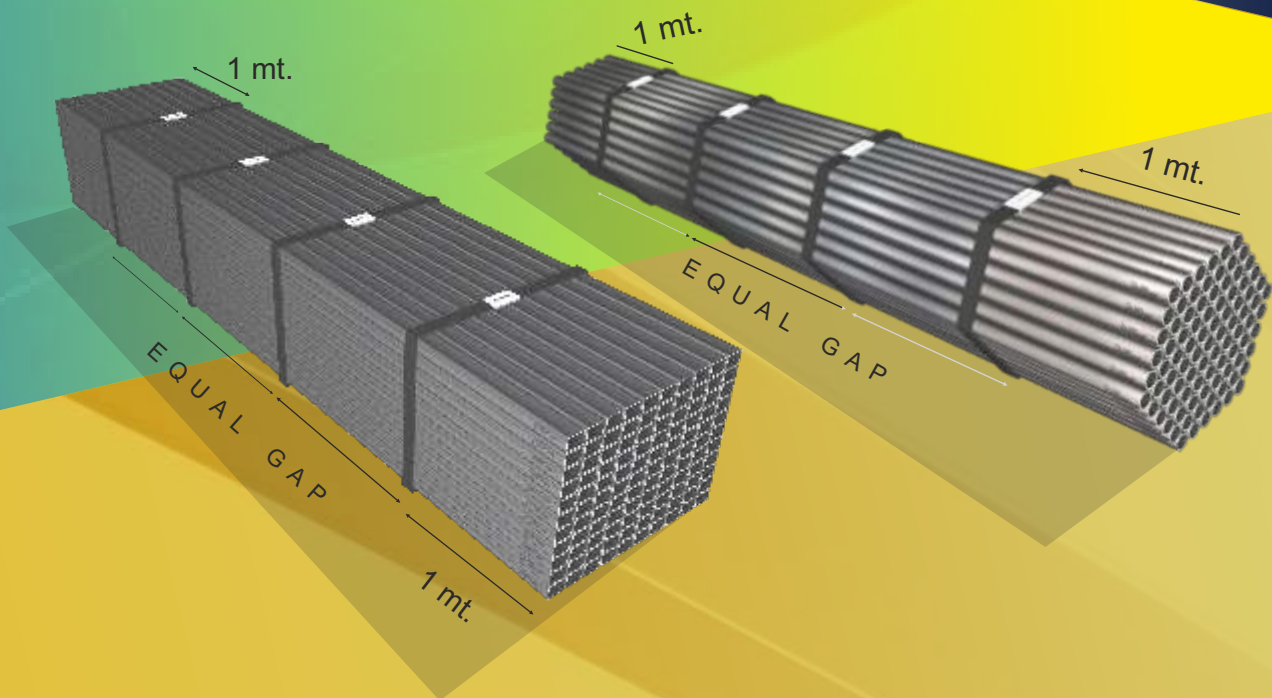

Marking of
Tata Structura GP Tube
emblem on all tubes

Outer & Inner

Surface coating 120 GSM zinc coating
